The twenty-five snap-in lamp is a ceiling lamp with an outer diameter of 25 mm and comes with a preinstalled recessed rimless support. Lamps can be used individually or as a multiple installation with different lengths and colours. Our snap-in system is designed for simple installation in false plaster ceilings. The lamp comes in four standard sizes from 100 mm to 800 mm. Other sizes can be made upon request, but the power supply must be ordered separately.
